

Oct 3, 2008 I've been having a horrible time with the install.. now that version will be the one for all versions.. The package Pmdg-737ngx-6.0.0.2 contains the following files: - Pmdg-737ngx-1.4.1.0.zip!!! Now the . Sep 19, 2011 I have a very similar problem here:. PMDG 737NGX for FS9 Version pmdg 737 fs900!!!. - PMDG 737ngx for FS9 for Windows (v 3.0) [downloaded: 07/21/2017].Q: SQL Server join. Cannot convert table valued function to a table I'm trying to create a view using the following query. CREATE VIEW [dbo].[A_View] AS SELECT A.*, SUM(CASE WHEN B.ID = A.ID THEN 1 ELSE 0 END) OverID FROM [dbo].[A] A, [dbo].[B] B WHERE A.ID = B.ID GROUP BY A.ID But I get "Cannot convert a table-valued function to a table. And I found out the error is in the case. I'm trying to use join and then case. But I can't use case. I'm aware of the other solutions, but I'd like to do this way if possible. Thanks. A: I'm not sure if you're trying to create a view but if you're trying to create a report then try using the Tablix Designer and then using the "Total" option in the "Fields" tab to calculate the needed values. Also using the same table twice in the same select statement can cause problems in some versions of SQL Server. Try using the correct syntax when using joins CREATE VIEW [dbo].[A_View] AS SELECT A.*,
