(I tried to make the image bigger and it still looks pixelated.) I would say that the text is not able to be read. However, from it appears that it is using the SVG format. " onclick="searchBox.OnSelectItem(7)"> Enumerator Defines Generated on Fri Jul 15 2011 13:16:17 for CMSIS DSP Software Library by 1.7.2 NADPH diaphorase-stained neurons in the rat nucleus of the solitary tract: localization, morphology, and ultrastructure. NADPH diaphorase-positive neurons in the rat nucleus of the solitary tract were investigated using light and electron microscopy. Only part of the cells were positively stained. These cells were observed in two subdivisions of the nucleus of the solitary tract, the intermediate and commissural subdivisions. They were not a characteristic cell type. Most diaphorase-positive cells contained large and round to oval mitochondria with smooth cristae. Well-developed Golgi complexes were also seen. In the intermediate subdivision of the nucleus of the solitary tract, 2d92ce491b
