The general purpose of this book is to offer teachers, students and researchers a complete guide for a wide variety of purposes, including: to teach or test for communicative competence and to learn English for employment. For the self-study of the student, the book is designed. 2-Chloro-6-fluoropyridazine: a novel fluorine-containing ureide-based antimycobacterial agent with no cytotoxic effects against host cells. Mycobacterium tuberculosis is the causative agent of tuberculosis (TB). Fluoroquinolones (FQs) are the most widely used second-line drugs for the treatment of M. tuberculosis, but these drugs cause adverse events due to the nonspecificity of their bactericidal actions. Fluorinated heterocyclic analogs are also highly antimycobacterial, while showing no cytotoxic effects. The combination of

3-(4-methylphenyl)-5-(3-bromophenyl)-2-furanyl-(4-ethyl)pyrimidin-2-ylthioureas (1) with 2-chloro-6-fluoropyridazine (2) was obtained as an antimycobacterial agent. In vitro antimycobacterial activity was evaluated using the resazurin microplate assay and the growth inhibition time assay against M. tuberculosis H37Rv and Mycobacterium smegmatis mc(2)155 (the third-generation MTB/Msm strain).

The minimum inhibitory concentration and minimum bactericidal concentration (MBC) against M. tuberculosis were 0.25-0.5 µg/mL and 1.0 µg/mL, respectively. The colony-forming units of mycobacteria were also decreased to less than  $1.0 \times 10^3$  CFU/mL (i.e., 99.9% bacterial death). Both 1 and 2 showed no cytotoxic effects against Vero cells up to a concentration of 50 µg/mL. The combination of 1 and 2 (1.5:1, µmol/L/µmol/L) showed synergistic antimycobacterial activity with a fractional inhibitory concentration index of 0.4390. Świdwiniec Świdwiniec is a village in the administrative district of Gmina Kołczygłowy, within Bydgoszcz

It was a New Year's weekend to remember for the community. On Saturday, Emily Friedman of Toronto was one of three founders of the grassroots group Up, Up, and AWOL, who plan to attend the upcoming 2020 UN General Assembly. Up, Up, and AWOL was formed after the UN passed a resolution on the UN Declaration of Human Rights in 2018. It was during that year, that Friedman was in New York attending a day of action when she learned about the events that were planned for the weekend, including a sit-in at the UN building. "We wanted to have a presence at the UN and to be present for the issue of the declaration of human rights and to let people know that the UN could be doing more to protect people from things like mass atrocities. So, I and two other people decided to go," Friedman said. During the UNGA, Up, Up, and AWOL plan to attend a protest in the General Assembly Hall that is scheduled to take place at 12:00 PM, on September 30th. "I think, we really want to highlight that the UN should be doing a better job and showing the world and making the world aware that they're not doing a good job," said Friedman. "We want to be there and show that they should be doing more to protect people, and they should be doing a better job of being transparent with their actions and policies." The group also plans to go to the UN's Human Rights Council. "We will be there with some other people because we really think that the council is even less transparent than the General Assembly," Friedman said. "We 2d92ce491b
