Q: Java to shell Script I am using the following snippet to execute a shell script which works when i run it from the command line using 'sh '. I want to execute it from java program. String command = "sh "; Process p = Runtime.getRuntime().exec(command); p.waitFor(); I am getting the error message, "Sh : not found A: You have to escape the """; Also, process.waitFor() does not wait for process to finish execution. It only waits for process to end in a way like System.exit() or getOutput() etc. Q: Why does this.htaccess file return a 403? I am trying to secure a site, but I am having problems. RewriteEngine On RewriteCond %{REQUEST_FILENAME}!-f RewriteCond %{REQUEST_FILENAME}!-d RewriteCond %{REQUEST_FILENAME}!\.+\$ RewriteCond %{HTTP_HOST}!^www\.mysite\.com\$ [NC] RewriteCond %{HTTPS}s ^on(s)| RewriteRule ^(.*)\$ [L,R=301,NE] #Turns off the HTACCESS engine for the current directory #(takes care of "File does not exist!" errors, 404s, etc.) RewriteCond %{REQUEST_URI}!=/favicon.ico RewriteRule.* index.php [L] RewriteCond %{HTTPS}!=on I was able to get this working by taking it out of the.htaccess file and putting it directly into the f3e1b3768c
