Category:Animal physiologyQ: Bootstrap 4: List all the features of carousel in 4.0 In the carousel docs: It says that the carousel has built-in features like "left arrow to navigate the slide" and "right arrow to navigate the slide" and "previous and next arrows to navigate the slide". Does anyone know which those are? I went to carousel's documentation but I can't find which are those. I need to use the carousel for an iPhone app. A: This info is located in the examples. From the first example, the features are: Navigation Previous, next, and arrows Progress indicator Slide number View all slides Each feature is described in a different section of the docs. -----Original Message----- From: Tribolet, Michael Sent: Monday, November 26, 2001 11:46 AM To: Bradford, William S.; Bradford, William S.; EOL Call Center; Dallen, David; Scholtes, Diana Subject: EnronOnline and UK Gas & Power Trading Ltd. (UK Power Co) EnronOnline and UK Power Company, L.L.C. (UK Power) are entering into a series of EOL transactions. The transactions are designed to result in the monetization of the UK Power trading position. Under the structure of the transactions, each party will act as a principal to the transaction with EnronOnline, ENA, acting as an agent for and on behalf of the other parties. The transactions are as follows: 1) US Power Transaction This transaction was entered into with EnronOnline on November 20, 2001. UK Power will be the purchaser and ENA will be the agent and the commodity will be US gas delivered to the storage facility in New York
